PROFESSIONAL SUMMARY

Ambitious Computer Science Engineering student with strong expertise in software development, data structures, full stack development, and data science. Skilled in building scalable applications and applying analytical thinking to solve complex real-world problems.

EDUCATION

B.E. Computer Science Engineering

VSMSRKIT, Nipani, Karnataka (VTU University)

CGPA: 7.8 | Expected Graduation: 2026

TECHNICAL SKILLS

- Programming:** C, C++, Python, Java
- Web Technologies:** HTML, CSS, JavaScript
- Database:** MySQL
- Core Concepts:** Data Structures & Algorithms, OOPS, DBMS, Operating Systems
- Tools:** Git, VS Code

INTERNSHIP EXPERIENCE

Full Stack Development Intern

- Developed responsive and dynamic web applications.
- Integrated backend systems with MySQL database.

Data Science Intern

- Performed data cleaning and preprocessing on real-world datasets.
- Built and evaluated machine learning models using Pandas and Scikit-learn.
- Generated actionable insights through data analysis.

PROJECTS

Customer Churn Prediction System

- Developed predictive ML model for telecom churn detection.
- Applied feature engineering and performance optimization techniques.

Full Stack Web Application

- Designed and implemented complete web application with frontend, backend, and DB integration.
- Focused on responsive UI and efficient data handling.

CERTIFICATIONS

Data Science Certification | Full Stack Web Development | Artificial Intelligence
