

RESUME

Aman Raju Mulla

Experienced and detail-oriented Bachelor of Engineering (BE) graduate with, A specialization in Artificial Intelligence. Skilled in Python, Front-end Development and Data Analytics. Currently studying with, A background from VSM's Somashekar R Kothiwale Institute of Technology Nipani, Belgaum. With hands on experience in academic.

Phone No :- 9353249213

Email Id :- amanmulla515@gmail.com

Location :- Nipani, Karnataka

CAREER OBJECTIVE

I am a Artificial Intelligence and Machine Learning student in branch of computer science. Interested in Artificial Intelligent (AI) and Python. My goal is to learn more, grow technical and analytic skills contribute to real world projects in company.

ACADEMIC QUALIFICATION

S.No	Qualification	College / University	Graduation Year	Percentage %
1	Under Graduation	VSM's Somashekhar R Kothiwale Institute Of Technology Nipani, Belgaum	2026	Overall CGPA 7.67

OTHER QUALIFICATION

- Basic Knowledge of Computer
- **Technical Skills:** Python and Front-end development
- **Soft Skills:** Communication, Teamwork and Problem-Solving
- Online Course Completed: Generative Ai
- MS Office
- AI Tool User

WORK EXPERIENCE

- Fresher

CERTIFICATES

- Generative Ai course: Build Innovative Apps & Website
- Internship and Job Preparation
- Training On Generative Ai
- Hack-O-Monia
- Generative Ai Powered Data Analytics Job Simulation

PROJECTS

- **Tic Tac Toe Game (Python Visualization)**

Developed an interactive Tic Tac Toe game using Python, featuring visual representation of the game board. The project allows two players to play alternately, displaying real-time updates and checking for wins, draws, or invalid moves.

- **Snake Game (Python Visualization)**

Developed a classic Snake Game using Python, featuring real-time movement, score tracking, and collision detection. The project visualizes the snake's movement and food generation using graphical libraries, providing an engaging user experience.

- **Cafe Menu**

Developed a Cafe Menu application using Python that allows users to view, select, and order food items. The program displays menu options, calculates total bills, and handles user input efficiently.

- **Digital Clock (Python Visualization)**

I created a digital clock application with Python and Tkinter that has an eye-catching interface and shows the time and date in real-time. Using time functions, the clock automatically updates every second.
